

ADVANTAGE EPOXY

COUNTERTOP QUICK GUIDE

HOW MUCH?

\$20-\$25 per square foot.

HOW LONG?

3-5 days to complete.

WHAT COLORS ARE AVAILABLE?

Everything is customizable. We work together to find a color and design to match your space.

WHY EPOXY?

Epoxy is an affordable way to achieve a stone-like look, without the cost of real stone. The epoxy used is food safe, durable, and UV resistant.

WHAT DOES THE HOMEOWNER NEED TO DO?

Before project start date, countertops need to be cleared, cleaned, and appliances moved away. Room temperature remains between 72-80 degrees during the project. Prep and clean up are included.

SINK REMOVAL?

Homeowner will have a licensed plumber remove the sink for the project.

TOP COAT?

Top coat is scratch, impact, and heat resistant. Top coat is smooth, but does have slight texture, similar to an orange peel.

CARE?

Use neutral, non-abrasive cleaners. Use hot pads for hot items and cutting boards when cutting.
